

**F MITSUBISHI ELECTRIC TRANE HVAC US** The S-Series (PUMY) single-phase air-source heat pump outdoor unit line includes Hyper-Heating INVERTER (H2i) technology in P36 (3-ton) and P48 (4-ton) models. Part of the CITY MULTI family of products, hyper-heating units offer up to 100 percent of rated heating capacity at 5 F and perform at 78 percent of rated capacity in temperatures as low as -13 F. Each unit is equipped with an INVERTER-driven compressor that optimizes energy use for the space. PUMY systems can heat or cool up to 12 individual zones.
