

2 **Mitsubishi Electric Trane HVAC US** introduces the SLZ-KF four-way ceiling cassette. Available in 9K, 12K, 15K, and 18K BTUH, it offers flexible airflow with two, three, or four-way vane control. Homeowners can personalize the settings, and improved indoor air quality and reduced operating noise are possible. The optional 3D i-See Sensor allows the unit to monitor a room's occupancy to provide even temperature distribution and energy-efficient operation. Designed for simplified installation.
